## Getting Started

Life always seems more complete when you can share it with a furry, scaly, finned, hooped or hard-shelled critter of your choice. And yes, YOUR pet is the best one out there!

Don't just take our word for it, get your iPhone/iPod out and start snapping pictures to upload into Petz to show the world that mug you love so much.

Petz is a great way to share your "Petz" with the world and to see everyone else's favorite critters.

- Our in-app-camera functionality allows you to snap pics directly inside the app, or upload them from your camera roll, then email them to us with a simple tap.
- Mark your favorite "Petz" and have them on hand to share with family or friends without having to search through all the photos again, and again, and again.
- Vote on the "Petz" you think are the best and what category you think they fit into like "Cute, Adorable, Funny, Sweet, Sassy, Hyper, Cuddly, and Peppy".
- Put your own description onto each "Petz" pic you submit and tell the world what's going on when the pic was taken or what you think Fido is thinking.
- Post comments to each pic and read what other folks have to say.

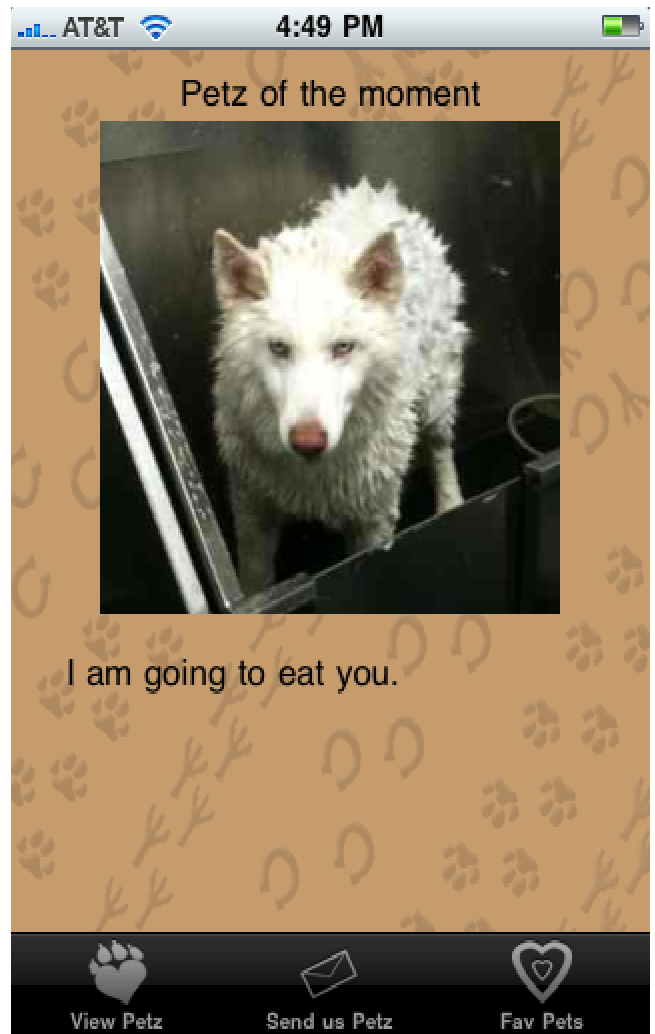

Petz! A great pet pic sharing application proudly offered by  
SeaDawn Designs.

Now, let's just jump in head first and get you familiar with our  
*"Petz Pix"*

The first thing you'll notice is the main screen once the app is loaded. This screen is the "Petz of the moment" page. This page shows a randomly selected pet to be viewed by our community when the app loads. Who knows? This might just be your pet!

The next thing you should notice is the bottom tool bar. Here you'll be able to select one of three options:

- a) "View Petz"
  - i) This takes you to the area where you can view all the Petz by categories, but we'll get in to that later.
- b) "Send Us Petz"
  - i) This is where one would go to submit their Petz. Again we'll get in to that a little later in this manual.
- c) "Fav Petz"
  - i) This is where one would view all the favorite Petz they have seen and saved as favourites.

## Detail View

Now, before we get into anything else, I need to tell you about the “Detail View”. This is the view you get when you tap on the picture you want to see. This view does a few things:

- Shows the picture in a bigger size
- Show the most popular vote category
- Shows the description of the pic

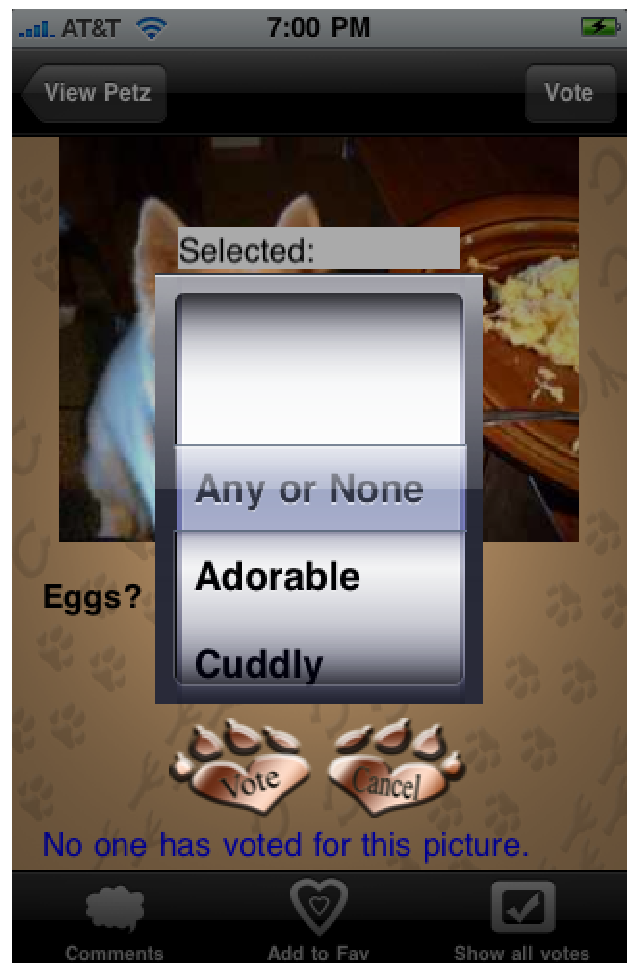

The bottom tool bar has three functions, which are:

- Comments button (Allows you to view all comments)
- Add to Fav button (Add the picture to your favorites)
- Show All Votes (Allows you to see all categories the Petz has been voted in to)

*(Continued on the next page)*

## Detail View, cont

You'll also notice a "Vote" button in the upper right corner. Tapping this button will pop up a vote wheel which lets you tell us what category you think the pic falls into! You'll also have the option to "cancel" out if you can't decide which way to vote. Please note that you can only vote on each picture ONE time. Once you've cast your vote, the "Vote" button magically transforms to "Vote recorded" and will remind you that you've voted it you happen to tap on it.

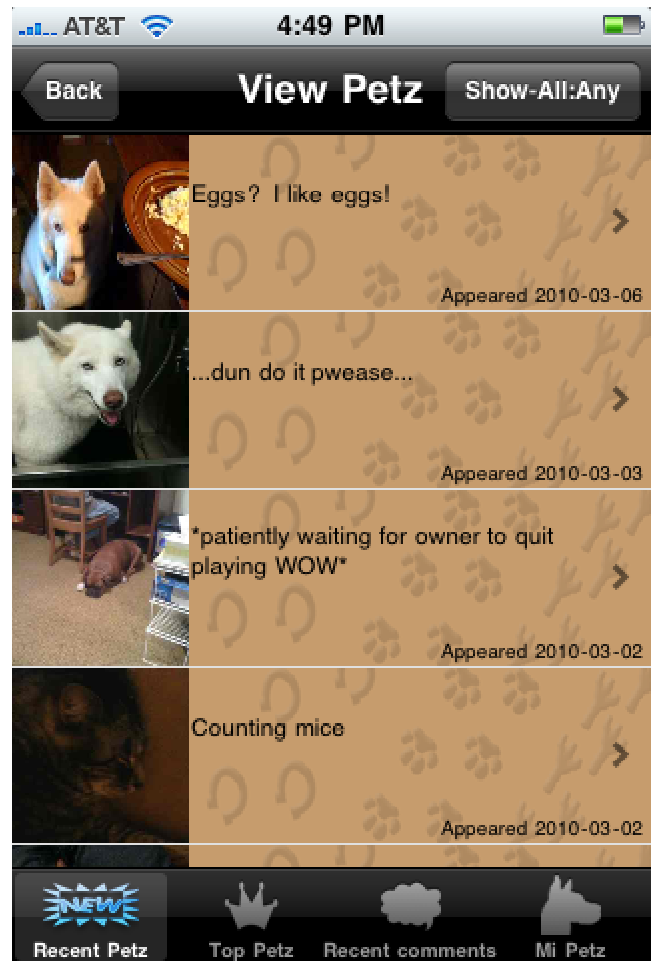

## *View Petz, In-Depth*

Now, lets click on the view Petz page button from the “Petz of the Moment” page. The first page you come to is the “Recent Pics” page. At this page you will view all of the Petz submitted from the newest to the oldest. You can think of it as going back in time!

In the bottom tool bar, lets tap “Top Petz”. This will bring up all the Petz, showing the most voted for Petz at the top — the least voted for at the bottom.

The next button in the bottom toolbar is “Recent Comments”. This allows you to view the most recent comment on any Petz, from most recent to least recent. This allows you to keep up with the most popular Petz of the hour!

Next is “Mi Petz” button. Here you will find all your submitted pictures stored locally on your device. Please keep in mind that only pictures that have been approved will be viewable.

*(Continued on the next page)*

## Cont. from “View Petz”

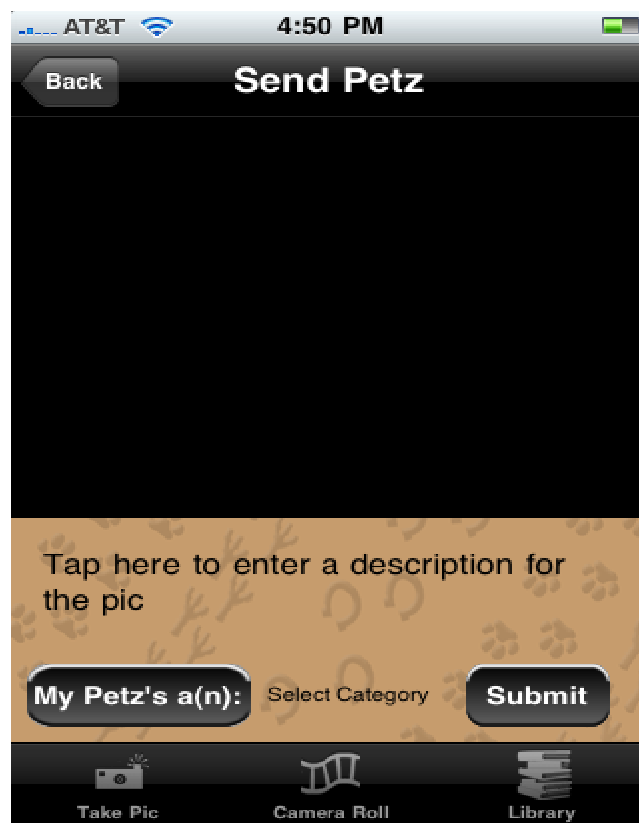

Now, look at the top of the “View Petz” page. You should see a button at the top-right hand corner that says “Show-All/Any” This is function allows you to get only the Petz that meet your search criteria. Let’s go ahead and give it a test.

First you must choose the type of pet you want to search for (Cat for example), then choose the vote category (Peppy for example). You would then be shown any Cats that have been voted peppy. The default setting Show all/any, shows all pets —regardless of Petz type or votes.

## “Send Us Petz”

Let’s take a look at how to upload pictures to the app. First, go all the way back to the “Petz of the Moment” page. Once there, tap on the “Send Us Petz” button, in the bottom toolbar. Once you have done this you should see a page like the one below.

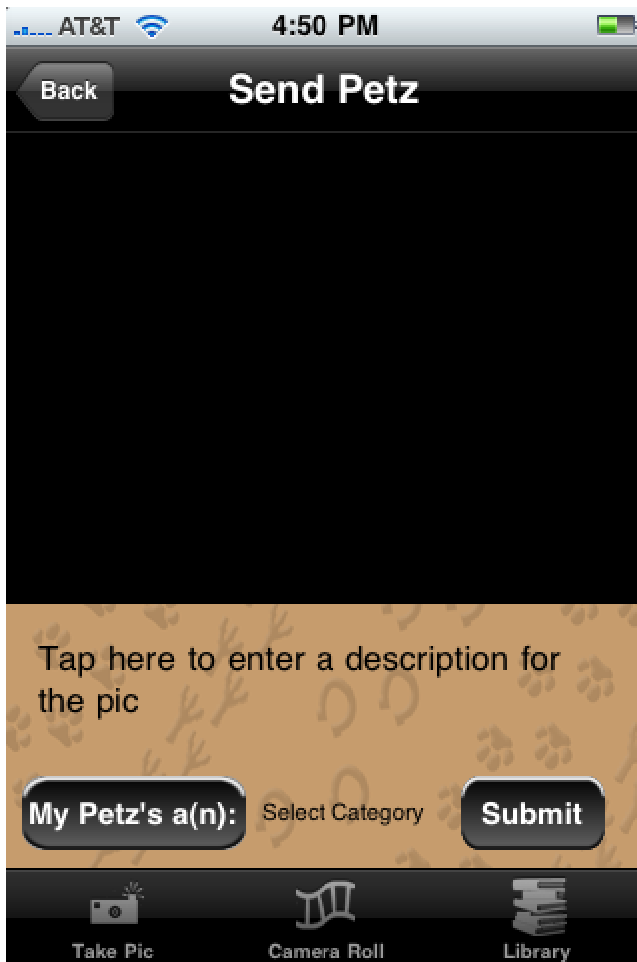

Lets take a look at the bottom toolbar on this page. There’s the “Take Pic” option, which allows you to use the in-app camera to take a picture, without having to leave the app. Then there is the “Camera Roll” option, which allows you to use any photos that you have taken using your iPhone’s camera. Finally, there is the library option. This option allows you to use any picture you have an your phone whether that’s an image you’ve taken or gotten of the web.

\*Please keep in mind that users using the iPod Touch will not be able to use the “Camera Roll”, or “Take Pic” options.

*(Continued on next page)*

## *“Send Us Petz, cont.”*

Now, once you have chosen your picture, it's time to submit it.

After you've chosen which picture to use, you will be brought back to this page (see picture to the right). Here you will need to select a category for your pet by tapping the "My Pet'z a(n)" button.

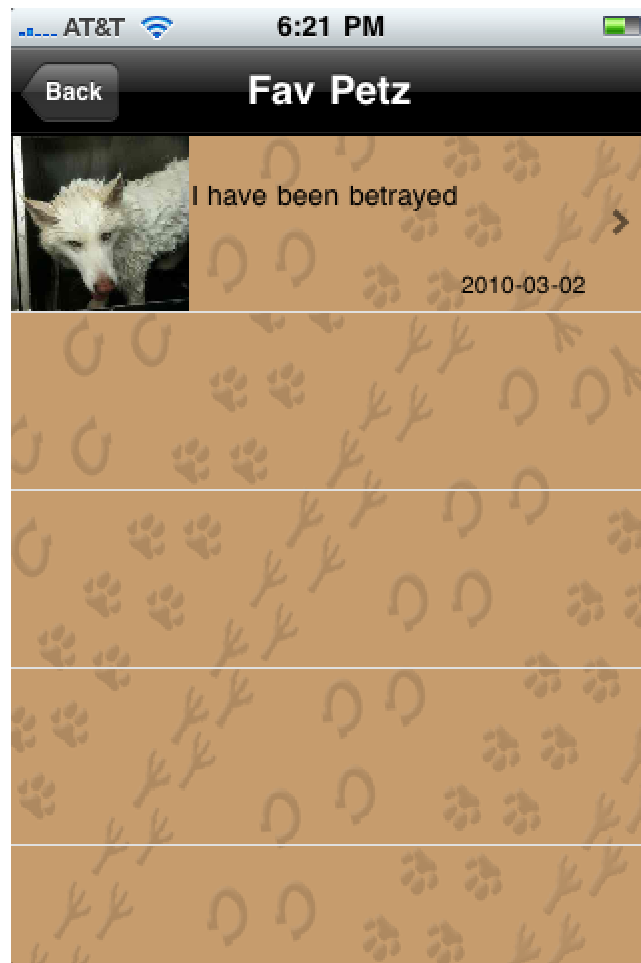

Use the pop up wheel to select the pet type. Press done when complete. Next, tap anywhere in the "Tap here to enter a description" area and enter in a brief description of what's going on, what you think your pet was thinking, or just a comment in general. Once

you've entered the text, tap the blue "Done" button in the upper right corner, or the "Send Petz" button in the upper left corner. Either option will take you back to the "Submit" screen. Now click "Submit" and your pic is on it's way to us to be sent down the chain for the world to view!

Please keep in mind that SeaDawn Designs must approve any submitted picture. We review them periodically.

## “Fav Petz”

Okay, back to the “Petz of the Moment” page. Once there, tap the “Fav Petz” button. This takes you to where you can view all the Petz you have in your favorites. As you can see in the sample below, this user has only one Petz in their favorites.

Thank you for your interest in Petz Pix and SeaDawn Designs! If you have addition questions or need assistance, please visit our website and click the “Support” button. Or, alternately, visit our Forums and post a message. We’re looking forward to seeing all those Petz out there, so grab the app, your device and start tapping!
